## Vertical Blinds

Combining European styling with practical functionality, our Shaderite EOS Vertical Louvre Drape system incorporates fabric vanes that can be tilted, stacked to the left or to the right, 'split end bunch' or 'centre stack' depending on your exact lighting requirements. Our fabric choices are extensive, available from blackout & translucent fabrics to combining both, all offer a large range of colours.

Each fabric has its own level of light filtration & are treated with the Sanitized® hygiene function to resist rot or mildew. Shaderite EOS Vertical louvre drapes are a low cost window furnishing that are a fashionable addition to compliment any home decor.

Shaderite EOS vertical louvre drapes give you levels of privacy & sun control with ease, whilst allowing you to alter the mood of any room by controlling the flow of light & breeze on every window. The EOS Vertical louvre drape system is available in wand control for simplicity & increased safety.

## Features

Channel Design.

Reduced Light Gap.

Slim slat traveller design.

Gravity Centering Blades.

Wand operation.

Slip clutch mechanism with chain control blinds.

Proportional spacing.

## Benefits

Sleek 25mm profile. Unique curved front design. Reversible for fabric insert. Track top recess for flush reveal mounting.

Dimensions: Height = 25mm Depth = 45mm.

200° Blade Closure. Standard gap at idle end = 2mm, & at control end = 10mm.

Louvre stack up to 20% narrower provides smaller stack back.

Blades automatically return to original position after being disturbed.

Simplifies operation with the use of a wand to open & close the blades. The new wand option improves the safety of your blinds eliminating cords & chains.

Whilst tilting your blades the slip mechanism prevents damage from overwinding and avoids costly long-term problems.

Your blind is manufactured with evenly spaced slats, providing you with constant overlapping blades.
