

Benefits & Features

- Australian made
Made in our new and innovative Queensland factory.
- Traditional look
Made with the distinctive appeal of a plantation shutter, but with the innovation of our patented Polymer Foam.
- 25 year transferable warranty
Unlike other companies that have warranties that stop with the original owner, a Thermalite Warranty is transferable between owners. Thus, ensuring a true asset gain when your home is sold.
- Will never crack, warp, shrink or discolour
Manufactured from our unique Polymer Foam, these shutters are guaranteed to outlast and outperform any other shutter on the Australian market.
- Minimal maintenance
No need to sand, paint or replace broken connectors. A simple wash regularly with warm soapy water and your Thermalite Shutter will be as good as new.
- Louvre's will never lose tension
With our patented technology, you are assured your Thermalite Shutter will work as good as the 1st day.
- 15 working days delivery time
With the advantage of a locally made product, your shutters will be shipped withing 15 working days.
- Exclusive Ultraclear mechanism
This world-wide patented system allows effortless operation of the louvre's with no possibility of loose and annoying connectors breaking or disabling your new Thermalite Shutters.

- Looks & feels like wood (not plastic)

Have the look and feel of a traditional plantation shutter, without it looking like a cheap, translucent plastic copy.

- Internal & External applications

The beauty of this product is that you can apply it internally or externally. Many other shutters are not suitable for both applications.

- Insulates 3 times greater than timber & reduces energy costs

With a great R-Value, Thermalite Shutters will reduce the heat coming in during Summer, as well as keep the warmth in over Winter.

- Made from non-toxic, recycled materials

No toxins are used in any Thermalite material. Thermalite is also made using recycled material.

- Flame retardant

Being fire retardant and self extinguishing, Thermalite is suitable for residential or commercial projects.

- Water resistant

Perfectly suited for bathrooms, kitchens or any 'wet' areas. Thermalite will not swell, warp or crack.

- Environmentally friendly

100% fully recyclable material, no trees lost here!

- Dents can be warmed out

Minor dents can usually be 'warmed out' using applied warmth.

- Termite proof

The dense, unique Polymer Foam is 100% Termite proof.

- Clean with soapy water

Being the most maintenance friendly shutter on the market, all you need is a little warm soapy water to remove most grime. We also recommend a wipe and occasional silicon spray on any moving parts (i.e. wheels, guides etc.)
